

Reference for Tim Poole & TLP Construction, Inc.
July 21, 2016

To whom it may concern,

We decided to build a detached garage / shop behind our house. Before meeting Tim we had received one outrageously high bid (double Tim's bid) and we talked with two other contractors who never got back to us.

We connected with Tim by walking down the street to a neighbor's home where he was building a large outdoor room.

After a couple of emails Tim came by to walk the location and made some good suggestions about the site plan. He quickly provided a proposal with a reasonable cost, detailed specifications and drawings. These specifications and drawings helped us receive quick approval from Architectural Committee of our Property Owner's Association. Tim did all of the work for building permits. He brought in his own subcontractors for concrete, AC, etc. We only had to deal with Tim.

Tim has been a pleasure to have around. As different problems or better ways to accomplish our goals came up he was easy to work with to make changes that resulted in a wonderful new workshop for us.

We were so proud of our new shop that before Tim could get away from here we asked him to build an outdoor screened room. Like the shop it all went smoothly and looks great.

Tim is not someone who cuts corners. I often made suggestions that might save him some hours or materials but when my suggestions compromised the integrity of the building or the ultimate appearance he was happy to talk me out of it.

Shirley and I highly recommend Tim for any size job from the smaller projects like we had up to designing and building a complete residence.

We would be happy to speak with potential clients of TLP Construction. Tim can provide our contact information.

Sincerely,

Gary and Shirley Hamilton
Hays County, Texas
