

To whom it may concern:

We are living in our second Tim Poole house and could not be happier. If we were to build again, we would want Tim to build it.

We appreciate how Tim listens to us when we start. He gets a feel for what we want to do. Then makes good suggestions on what to upgrade or what to hold back on. He understands the design of the home is key to enjoyable living. He helped us to remove "dead space" and to open up areas that would be lived in the most. When we built on a lot with a view he rearranged the rooms so that the rooms used the most would have the best view, then situated the house at the right spot with the best view. An example of what he did that really added to our enjoyment: he suggested the fire in the master bedroom be high enough so that we could view it easily while lying in bed. We appreciated that a lot after we moved in.

The home we are in now, with the pics, has a lot of trees around. Tim did a great job of including those in the design of the house. We even have a zip line, thanks to Tim!! When we realized that we needed to separate the TV from the rest of the home for when we have quests, Tim made that happen so that we could have the guys watching the game in the TV room, loudly, while the ladies were visiting in the comfortable great room.

It was wonderful to work with a man of integrity so that we did not feel like we had to be on site all the time worrying about what was happening. We went to the site a few times a week to see the progress and were always impressed at how it moved along. Our questions were answered and when we wanted changes they happened.

We have been happy with our experiences with Tim and can give him our highest recommendation. If you have any questions or concerns feel free to contact me.
